Tharun Kumar P

CS UnderGraduate

EDUCATION

B.Tech in Computer Science – PES University
CGPA: 8.86 | 2021-2025

12th Grade – MES Kishore Kendra P.U. College
Grade: 97.5% | 2021

10th Grade – Venkat International Public School
Grade: 95.6% | 2019

TECHNICAL SKILLS

- **Programming Languages:** Python ,C , Java , JavaScript , HTML/CSS
- **Web Development :** SpringBoot ,ReactJS , Node.js ,Express.js ,Django ,RESTful APIs
- **Database Management:** MySQL ,MongoDB
- **Cloud and DevOps:** AWS, Docker, Kubernetes, CI/CD, Jenkins, Git
- **Mobile Development(Basics):** React Native, Flutter
- **Machine Learning(Basics):** Scikit-learn, TensorFlow, Pandas, Numpy, Data Visualization
- **UI/UX Design:** Figma, Canva

PUBLICATION

“11th ICCSP 2025 – Intelligent Feedback Analytics: Sentiment Analysis and Defect Detection in Elevating Product Quality and Customer Experience”

Published an end-to-end data analytics framework leveraging Whisper, BERT, spaCy, and zero-shot classification to transform unstructured voice feedback into structured insights. Achieved strong sentiment and defect detection performance across multilingual datasets, with visual analytics to support data-driven product enhancements.

CERTIFICATIONS

- **Machine Learning Specialization**
Stanford University, Coursera
- **Front-End Developer Professional Certificate**
Meta, Coursera
- **Back-End Developer Professional Certificate**
Meta, Coursera
- **Google Cloud Security and Operations**
Google Cloud

HONORS AND AWARDS

- 2 Times **CNR Rao Scholarship Awardee** | PES University – Given to Top 25%
- 4 Times **Distinction Awardee** | PES University
- **Award For Scoring 100 in Physics, Mathematics and Biology** at MES Kishore Kendra PU College: Jul 2021
- **Best Figma Prototype Award**

WORK EXPERIENCE

Software Development Engineer Intern

Société Générale GSC | Feb 2025 – Aug 2025

- Built and deployed a Streamlit based high-volume Data Comparator Tool supporting multiple file formats, with multi-key comparison, parallel processing, XML flattening, and detailed reconciliation summaries—accelerating data migration and audit cycles.
- Migrated legacy COBOL modules into scalable Java Spring Boot microservices and integrated them with core enterprise systems via secure REST API endpoints.
- Built responsive web pages using a scalable React component architecture; developed and integrated backend Spring Boot APIs with Swagger documentation.
- Optimised OracleDB SQL queries with PostgreSQL compatibility for cross-environment deployment.

Project Trainee

Volvo CE India Pvt Ltd | Jun 2024 – Aug 2024

- Automated PowerBI tasks using Python, reducing reporting time by 30%.
- Implemented SARIMA models for sales forecasting, improving prediction accuracy.
- Mastered Oracle NetSuite ERP for purchase/sales orders and warranty processes, optimising workflow efficiency.
- Supported Agile processes, including MVP handovers and requirements gathering.
- Documented Salesforce CRM app to enhance corporate workflow efficiency.

Software Developer Intern

Austere Analytics Pvt. Ltd | Jun 2024 – Sep 2024

- Architected and deployed a full-stack CRM SaaS using MERN and MySQL.
- Led the entire SDLC from inception to delivery.
- Led data migration, client-specific routing and AWS deployment.
- Managed testing, prototyping, and access management for pharma clients.

Full Stack Developer Intern

Cosyugma Info | Jul 2023 – Oct 2023

- Led the development and deployment of a React web application with Django backend integration, driving performance enhancements and UI/UX improvements. Additionally, spearheaded the design and hosting of the company's official website.

Machine Learning Summer Intern

Center for Innovation and Entrepreneurship, PES University | Jun – Jul 2023

- Focused on 'Data Streaming Anomaly Detection,' implementing ML techniques and Intel optimisation algorithms. Applied theoretical knowledge in a practical environment, optimising detection models for real-time data.

Web Development & Designing Intern

The Sparks Foundation | Jun 2023

- Executed seamless Razorpay API integration into a website and successfully hosted a MongoDB database online. Designed and developed responsive web pages using HTML, CSS, and JavaScript, while elevating UI/UX through strategic design.

PROJECTS

Back-Up Service Using Docker and Kubernetes:

- Automated backup service to Google Drive using Docker and Kubernetes, employing CronJob, Persistent Volume Claims, and Kubernetes Secrets and logging.

Lucene-Powered Document Retrieval Explorer

- Built a Java desktop app using Apache Lucene for full-text search for Wikipedia article's corpus with a GUI, supporting multi-type queries and result highlighting.

Encrypted P2P File Sharing System

- Developed a secure SpringMVC-based file sharing system with AES encryption, SHA-256 validation, MongoDB integration with design pattern driven architecture.

Cloud Data Management System

- Built a Python-based file transfer application using socket programming to enable secure file uploads, downloads, and listings on a remote server.

Apartment Management System(MERN Stack)

- Engineered a role-based apartment management platform with React, Node.js, Express, and MySQL following Agile best practices like SCRUM.
